

GSN Community Setup Pack: Client Handover Map

(2026-09-14)

Authenticity mark: GSN Original Community Setup Material | Source-controlled in gmfn_mvp/docs | Document date: 2026-09-14

Document date: 2026-09-14

Pack: GSN Community Setup Pack

Authenticity mark: GSN original community setup material, source-controlled in `gmfn\_mvp/docs`.

Who Receives What

| Recipient | Send | Purpose |

|---|---|---|

| Sponsor, founder or senior leader | Setup guide PDF, selected audience copy, deployment pack index summary | Helps them understand what GSN sets up and what decisions still belong to the organisation. |

| Community/domain admin | Setup guide DOCX/PDF, dependency map, route/recovery map | Helps them operate setup, member entry, notices, shop controls and recovery paths. |

| Ordinary members | Member-safe setup guide sections, audience story copy, QR download sheet, live invite/QR link | Helps members join, respond, sell, ask, verify and recover without seeing internal tooling. |

| Treasurer, welfare lead or finance steward | Setup guide sections on finance/trust/payment evidence plus route/recovery map | Helps them understand money/evidence boundaries without overclaiming payment automation. |

| Shop or market coordinators | Shop setup, Public Shop, Spotlight, DemandBox and analytics sections | Helps sellers set up products/services and understand what counts as attention versus proof. |

| External partner, funder or reviewer | Selected real-life copy, feature inventory summary, documentation issue register if formal due diligence is needed | Helps them see evidence discipline and current limits. |

Client Handover Bundle

Minimum bundle:

- `GSN\_SELF\_SERVICE\_USER\_GUIDE.pdf`
- `GSN\_COMMUNITY\_SETUP\_QR\_DOWNLOAD\_INDEX\_2026-09-14.pdf` when people need phone scanning instead of typed links
- one audience-specific real-life copy
- one current live app invite/QR/member entry instruction generated from the actual community
- support/recovery contact path

Admin bundle:

- minimum bundle
- `GSN\_FEATURE\_DEPENDENCY\_AND\_SETUP\_MAP.md`
- `GSN\_ROUTE\_AND\_RECOVERY\_MAP.md`
- relevant setup action plan for the client type

Internal operator bundle:

- admin bundle
- `GSN\_FEATURE\_INVENTORY\_AUDIT.md`

- `GSN\_DOCUMENTATION\_ISSUE\_REGISTER.md`
- `GSN\_IN\_REAL\_LIFE\_MASTER\_CAPABILITY\_BANK.md`
- `GSN\_IN\_REAL\_LIFE\_SELECTION\_MAP.json`

Distribution Flow

1. Choose the audience type: church, school/youth, NGO/charity, cooperative/market/business, family/diaspora/association.
2. Send the audience copy first, not the full master bank.
3. Include the QR download index or the per-document QR page when the recipient may open the material on a phone.
4. Confirm what the group is actually setting up: identity only, member entry, bulletin, shop/marketplace, finance/trust, or full Community Domain.
5. Send the setup guide sections that match the confirmed setup.
6. Generate live invite/QR/contact links from the current app for that exact community.
7. Ask the client to distribute only member-safe material to members.
8. Keep internal inventory, issue register and source JSON inside the GSN operator pack unless due diligence requires sharing.

What Clients Must Not Be Told

Do not tell clients:

- GSN proves a member is trustworthy by itself.
- A view, click, chat, call or share is a buyer or sale.
- Advanced analytics is a guaranteed business model.
- WhatsApp, phone, payment or external platforms can be controlled after the user leaves GSN.
- Every capability in the master bank is live for every client.

Correct phrasing:

GSN organises setup, records real actions where the app can observe them, and presents evidence for people to review. The receiving person or organisation still decides.
